

Pro Timekeeping

UKG Pro™ Timekeeping (formerly UltiPro® with Workforce Dimensions Timekeeping) helps organizations save time and resources by enabling more accurate time collection, ultimately reducing payroll errors and costly overtime for employees. With the reduction of manual, time-consuming administrative tasks, the digitally transformed solution helps improve workforce productivity, so your staff can focus on more strategic initiatives.

Improve Productivity

Automate and streamline time-consuming tasks, improving the efficiency of major workflows. Through the personalized home screen, users can directly perform actions such as punching in, editing and approving time, and reporting paid time off. Real-time workforce data visibility, such as DataViews and reports, also help improve decision making.

Engage Employees

Make it easy for your workforce to see and manage all shift, holiday, and time-off information, as well as view schedules, in one place. With one-click actions and mobile optimization, users can perform simple tasks quickly and conveniently from their own devices.

Ensure Compliance

Allow your people to view critical information at a glance, helping to ensure regulatory guidelines are being enforced. Provide accessibility in accordance with Web Content Accessibility Guidelines (WCAG) 2.0 Level AA to improve overall usability for employees with changing abilities.

Manage Labor Costs

Assure fewer payroll errors are occurring by enabling visibility into timecards and exceptions such as missing, early-in, and late-out punches. Increase labor-costing accuracy, strengthen auditability, and reduce off-cycle paychecks.
